

Matheus Barbosa

FULL-STACK DEVELOPER

I hold a degree in Systems Analysis and Development with 5 years of experience as a developer. Currently, I am seeking an employment opportunity that allows me to consolidate my career and apply my knowledge in a structured professional environment.

EXPERIENCE

Freelancer, São Paulo — Front-end Developer

Since December 2021

Project - Arcanimal - ([Project Link](#))

Development of a Platform for Locating Lost Animals and Managing Shelters

As a front-end developer, I had the opportunity to participate in the development of a platform aimed at locating lost animals and managing animal shelters using React and Angular.

Project - JustMovies - ([Project Link](#))

Web application developed with Next.js, Tailwind CSS, and The Movie Database (TMDb) API. It functions as a central hub to track upcoming movies, offering the option to view synopses and save favorite films.

Project - CoolTasks - ([Project Link](#))

A to-do list application developed using modern technologies such as Firebase, NextAuth, and Next.js. The main objective is to offer users an intuitive and secure experience for efficiently managing their daily tasks.
